PROFILE

Detail-oriented Software Engineering undergraduate with hands-on experience in full-stack web application development using Java, Spring Boot, React, and MongoDB. Possesses strong knowledge of Agile methodologies, SDLC, and object-oriented programming principles, with proven analytical and problem-solving skills. Passionate about software engineering, IT infrastructure, and data-driven technologies, with the ability to adapt quickly and contribute effectively in collaborative, fast-paced environments. Eager to expand expertise in software development, system analysis, and data engineering while delivering high-quality solutions.

PROFESSIONAL EXPERIENCE

11/2025 - 02/2026 Maharagama	Application Support Engineer - Trainee <i>Breadcrumbs Innovations Pvt(Ltd)</i> • Collaborated with a Tech Lead and two Associate Engineers to deliver effective application support services. • Supported system implementations and performed application configurations for client deployments. • Deployed client systems using Docker, applying DevOps practices to ensure consistent, reliable, and efficient deployments. • Assisted with environment setup, troubleshooting, and post-deployment support to ensure smooth client onboarding.
02/2025 - 08/2025 Colombo	Intern IT Infrastructure <i>Infomate Pvt(Ltd) - John Keells Holdings</i> • Delivered end-user technical support by troubleshooting software, login, and system issues, ensuring minimal downtime and high user satisfaction. • Streamlined onboarding processes by managing account creation, access provisioning, and permission control for new employees. • Maintained and configured IT infrastructure, including device setup and asset management, to support efficient daily operations. • Managed helpdesk tickets and contributed to IT audits, ensuring timely issue resolution, accurate asset tracking, and system compliance.
03/2024 - 09/2024 Colombo	Internship Trainee <i>Sampath Bank Head Office</i> • Managed the end-to-end credit card application and issuance process while ensuring compliance with banking procedures. • Prepared and processed CRIB documentation to support credit verification and risk assessment. • Maintained accurate customer records and performed data capturing in line with banking standards and policies. • Handled customer inquiries and processed Fixed Deposit (FD) applications, ensuring efficient and timely service.

EDUCATION

2024 Malabe, Sri Lanka	BSc (Hons) in Information Technology (Specialising in Software Engineering)) <i>Sri Lanka Institute of Information Technology (SLIIT)</i> • 3rd year
2023 Colombo	G.C.E Advanced Level Examination <i>Nalanda College Colombo 10</i> • Engineering Technology - 3C's
2017 Colombo	G.C.E Ordinary Level Examination <i>Nalanda College Colombo 10</i> • 8A's 1B

PROJECTS

2026	Cakies - Order and product management System - <i>Technologies</i> - Engineered a scalable full-stack application using React.js, Vue.js, Node.js (Express), and Firebase Hosting. - Collaborated with clients to gather requirements and deliver iterative, feedback-driven enhancements. - Built a secure admin dashboard granting artists full control over product management with complete CRUD functionality. - Developed an end-to-end online ordering system with RESTful APIs, while integrating business locations and social media to enhance user engagement.
2025	Health Insurance Management System - Developed a full-stack Health Insurance Management web application with modules for policy management and review management, following a package-based architecture. - Implemented user authentication, order processing, and a responsive user interface to enhance usability across devices. - Contributed as the developer for the Review Management System, handling both frontend and backend implementation. - Containerized and tested the complete system using Docker, ensuring consistent runtime environments and seamless deployment across multiple environments.
2025	Student Course Management System <i>Technologies</i> - Java, SpringBoot, HTML, CSS - Developed a website of student course management system with Login validation, user authentication, CRUD operations and UI enhancements. - Role: Developed the Review Management system with front end and backend.
2024	Water Level Monitoring System <i>Technologies</i> - Ardiuno, Ultrasonic sensor, C++ - Designed a water level monitoring System with Arduino and ultrasonic sensor which can measure the water level by indicating the LED of Red, yellow and Green.(After the Red indicates motor will trigger and start pumping water) - Role: Designing the structure and implemented the code with C++

TECHNICAL SKILLS

Programming Languages - Java - JavaScript - Python	Backend Frameworks Spring Boot, Node.js, Express.js
Frontend Frameworks HTML, CSS, React.js, Vue.js, Angular	Software Development Practices - OOP - Debugging - RESTful API Development
Databases MSSQL, Postgresql, MongoDB	Project Collaboration & Workflow Tools Git, GitHub, Agile methodologies, Docker

CERTIFICATES

11/2025	Web Development <i>Informatics Institute of Technology (IIT)</i>
2021	Cambridge English Level 2 - PET <i>Cambridge University</i> (Passed)
